TH-SS 405 E Scroll Saw

Art.-No. 43.090.40

Precise, complicated work on wood, plastic, aluminium, plexi glass or gypsum are challenges for example in model construction. With the stable parallel arm it is easy to saw accurately. The flexibility of the TH-SS 405 E points itself when working to the millimetre range, sawing perfect round forms and circles out. A blower device removes the dust particles directly in front of the saw blade. The transparent saw blade protection offers optimal security without disturbing the work. For mitre cuts you can adjust the workbench up to 45 degrees.
